Lieutenant Commander Frank Müller, Programme Manager, NH90 Training Media,
Netherlands Ministry of Defence Directorate of Materiel

Lieutenant Commander Müller joined the Royal Netherlands Navy to become a pilot in 1985. In 1990 he was sent on an exchange program with the US Navy to Jacksonville, Florida where he became a Lockheed P-3 Orion instructor pilot at the VP-30 Training Squadron.

During his three year exchange program, LCDR Müller was the pilot track manager for the Instructional Systems Department. He was closely involved with the introduction of the first CBT, the new co-pilot syllabus and successfully merged East and West coast training programs, which were considerably different.

Back in the Netherlands, he continued to be an instructor and has been the manager of P-3 Operational Flight Trainer, the Synthetic Training Department, Training Support Department, and the Aircrew Training Department.

After the closure of NAS Valkenburg at the end of 2004, LtCDR Müller joint the NH90 helicopter Project team to lead the introduction of the training aids and simulators. He is now responsible for the acquisition and introduction of all required training media for the NH90 helicopters which include Computer Aided Instruction, the Virtual Maintenance Trainer, the NFH Mission System Trainer, and the NH90 Full Mission Flight Trainer.
