Christian Olesen, Manager, Finished Products & Medical Devices, **Novo Nordisk**

Christian is a M.Sc. (Eng) specialising in International Technology Management with a solid background in Project Management, Production Strategy, Logistics, Supply Chain Management, Cold Chain and Production Engineering.

Throughout his career, Christian has completed a vast number of projects mainly in relation to new product launches, production establishment and supply chain strategy. He is also very experienced in fields such as implementation of new factories in existing supply chains, commissioning of new distribution centres, and redirecting of sourcing.

On top of being a capacity in his specialty field, Christian is a strong communicator at all organisational levels, he is good at engaging and motivating the teams he manages, and his insight into diverse engineering disciplines as well as managerial and business disciplines makes him a strong integrator.

In addition to this, Christian has experience in daily management of logistic flows in large scale manufacturing across borders and continents. Furthermore, Christian has in the past worked with production establishment in Eastern Europe and business development in South-East Asia.
