Andrew Tucker, Water Efficiency Manager, **Thames Water**
Andrew is the Water Efficiency Manager at Thames Water. Key roles will be to ramp up the delivery of water savings programme across domestic and commercial customers. These programmes will be delivered in parallel to smart metering rollout and as bespoke demand management initiatives – including home retrofitting, water audits, businesses and schools, and water efficiency communications, propositions, tools and advice. Andrew is also linking water efficiency to wider affordability and vulnerable customer agendas. Previously, Andrew has been the Water Strategy Manager for the Energy Savings Trust. Working to integrate and drive water efficiency through the UK energy efficiency and carbon reduction agendas - responsible for introducing the Water Energy Calculator, designed to provide personalised water, energy, carbon and money savings from water efficiency for UK housing stock.Prior to EST, Andrew was Principal Policy Officer for Climate Change Adaptation and the Manager of the London Climate Change Partnership at the Greater London Authority. Andrew has also worked in the Australian mining industry as an Environmental Adviser, within coal and base metal mining and processing operations.
