Karyn Bouhana, Senior Research Scientist Pharmacology, **Array BioPharma**

Karyn Bouhana is a drug discovery pharmacologist with 20+ years of industry experience. Since joining Array BioPharma in 2006, Ms. Bouhana has been a co-leader on drug discovery project teams in the fields of pain and oncology. Ms. Bouhana's' current research focus is on the pharmacology and safety of allosteric modifiers of the NGF/TrkA pathway aimed at providing new small molecule pain therapeutics for both chronic and acute pain indications. Prior to joining Array, Ms. Bouhana was at Sirna Therapeutics working in the areas of Angiogenesis and Macular Degeneration using chemically modified and stabilized siRNA. Ms. Bouhana received her B.Sc. in Molecular, Cellular and Developmental Biology from the University of Colorado, Boulder.
