

Augustine Igwegbe

Regional IT Business Systems Manager

Shell Upstream International, Sub Sahara Africa

Augustine Igwegbe is currently the regional Information Technology Business Systems Manager for Shell Upstream International, Sub-Saharan Africa. He was previously the regional Information and Technology Manager of the same organisation. He has held various positions within and outside Shell, which contributed positively to his more than 28 years of experience. His previous jobs in Shell include Regional Technology Manager for Shell Exploration and Production (EP) Africa, Head of IT Operations Shell Petroleum Development Company of Nigeria (SPDC), Head of SPDC Subsurface Information Technology and Senior Oil & Gas Economist/Planner. His career in Shell has also taken him to Netherlands, where he spent four years as the Technical Project for the Group Common Systems.

He had worked in manufacturing (Michelin), Banking (United Bank for Africa Ltd) and Consulting (KPMG) before joining Shell in 1988.

As the Shell regional Technology Manager for EP Africa, Mr. Igwegbe led IT department that managed one of the biggest private communication network in Africa. The network covers Shell's vast footprint in the Niger Delta. As the Regional IT Business Systems Manager, his core accountability is to act as the IT partner to the Sub-Saharan Upstream business, accountable for the appropriate use of innovative IT solutions to enable the implementation of new business requirements and end-to-end delivery of IT services.

Mr. Igwegbe is a Nigerian and holds B. Sc in Computer Sciences.
