Paul Wilson, Senior Investigator, **GlaxoSmithKline**

Paul Wilson has worked for 12 years as a research analyst with GSK. He has supported a number of systems biology focussed initiatives and has expertise with relevant analysis methods, including, microarray analysis, Interaction/network analysis and eukaryotic promoter analysis. He has a particular interest in the de-regulation of transcription in inflammatory signalling and is currently involved in a number projects that integrate mRNA and RNAi datasets with clinical readouts to identify differentially regulated transcription networks that may be causative in disease progression.
