Daniel Bar-Shalom

Is an Associate Professor at the Faculty of Pharmaceutical Sciences, University of Copenhagen, and at Bioneer, a non-for-profit organization providing services to the Biotech and Pharmaceutical industries. Before studying pharmacy and qualifying as a pharmacist, he studied biology, botany in particular. He own and managed a pharmacy with considerable compounding activities and served as a medical officer (pharmacist) in the Israeli Army. In both situations he gathered insight into the problems of drug administration which led him to start a drug-delivery company, Egalet, where he worked for more than 20 years. The main technologies being Egalet, an erosion based controlled release dosage form and Parvulet, a child-specific formulation. He consulted to the pharmaceutical, medical-device and cosmetic industries, many of his inventions maturing into marketed products. He is involved in initiatives to improve the medication of pediatric and geriatric therapies and formulations. He is the inventor of numerous patents, has authored papers, reviews, book chapters and assiduously presents his - often unconventional - views in meetings, symposia and interest groups.
